UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF CALIFORNIA  
SAN JOSE DIVISION

TECHNOLOGY PROPERTIES LIMITED  
LLC, et al.,

Plaintiffs,

vs.

BARNES & NOBLE, INC.,

Defendant.

CASE NO. 12-cv-03863-VC

DEFENDANT BARNES & NOBLE, INC.'S  
REPLY BRIEF IN SUPPORT OF MOTION  
FOR JUDGMENT ON THE PLEADINGS

Date: March 17, 2015

Time: 10:00 am

Place: Courtroom 5 – 4<sup>th</sup> Floor

Judge: Hon. Paul S. Grewal

**PRELIMINARY STATEMENT**

The opposition brief (“Opp.”) of Plaintiffs Technology Properties Limited, Phoenix Digital Solutions, and Patriot Scientific Corporation (“TPL”) does not provide any actual reason – as a matter of fairness, efficiency, or anything else – why this Court should permit it to harass Barnes & Noble by relitigating its case against the NOOK products in this Court after losing in the ITC and choosing not to appeal. TPL had every chance to prove its case in the ITC, and it failed to do so. TPL could have appealed that decision to the Federal Circuit, but chose not to. This Court should not allow TPL to put Barnes & Noble through another lengthy, expensive proceeding to re-establish the company’s right to sell NOOKs without infringing TPL’s ‘336 patent. The language and principles underlying *Kessler v. Eldred*, 206 U.S. 285 (1907), require dismissal.

*Kessler* by its terms applies to any “court of competent jurisdiction” and “wherever the judgment is entitled to respect,” *id.* at 289, both of which indisputably cover the ITC’s decision here. TPL ignores this crucial language. Moreover, there is no dispute that appeals from ITC decisions are binding, and thus, the question is not whether an ITC judgment can be binding – it plainly can if affirmed on appeal – but whether a party can render it non-binding by strategically choosing to forgo an appeal. TPL provides no reason why this case should be an exception to the well-established rule that a party cannot avoid the binding effect of a judgment by choosing not to appeal it.

Rather than confront these points, TPL suggests that the Federal Circuit has already decided the issue. But as Barnes & Noble pointed out in its opening brief, it has not. TPL fails to address the fact that *none* of the Federal Circuit cases held an ITC judgment of non-infringement to be non-binding, and thus none had any reason to consider the *Kessler* doctrine. Similarly, TPL’s suggestion that ‘B&N has cited no case – because there is none – in which a court applied the *Kessler* doctrine to bar a district court case based on a decision from the ITC,’ Opp. at 10, is unavailing. It is equally true that TPL has cited no case that rejected application of the *Kessler* doctrine to an ITC decision (or to the decision of any tribunal). Given the lack of precedent on either side, this Court must decide whether the language and reasoning of *Kessler* apply here. The

1 answer is straight-forward: Every bit as much as a federal court (and far more than a state court,  
2 to which the Federal Circuit still applied *Kessler*), the ITC has jurisdiction and competence to  
3 decide the issue of non-infringement, and companies should not have to re-defend their products  
4 from the same infringement allegations when a losing ITC complainant fails to appeal to the  
5 Federal Circuit. Indeed, the Supreme Court created the *Kessler* doctrine precisely to prevent the  
6 kind of harassment that TPL is attempting to inflict here with a second suit after a judgment of  
7 non-infringement.

## **ARGUMENT**

## **THE KESSLER DOCTRINE BARS TPL FROM RELITIGATING WHETHER BARNES & NOBLE'S NOOK PRODUCTS INFRINGE THE '336 PATENT**

#### A. The Kessler Doctrine Prevents TPL from Relitigating a Finding of Non-Infringement

The express language of *Kessler* establishes that the *Kessler* doctrine applies here. In *Kessler*, the Supreme Court held that a prior judgment of non-infringement, “whether it proceeds upon good reasons or upon bad reasons, whether it was right or wrong, settle[s] finally and everywhere” the claim of infringement. 206 U.S. at 288. And the Court stated exactly which tribunals could create a binding judgment of non-infringement: “If rights between litigants are once established by the final judgment of a *court of competent jurisdiction* those rights must be recognized in every way, and *wherever the judgment is entitled to respect*, by those who are bound by it.” *Id.* at 289 (emphases added). As discussed in Barnes & Noble’s motion, the ITC is plainly a “court of competent jurisdiction” and its “judgment is entitled to respect.” Defendant Barnes & Noble, Inc.’s Motion for Judgment on the Pleadings (“Mot.”) at 6. TPL does not dispute these points and provides no response at all to this binding language in *Kessler*.

23 Furthermore, the principle underlying *Kessler* applies equally to the ITC's decision here as  
24 it does to the judgment of any other tribunal. The rationale of the *Kessler* doctrine is that a  
25 patentee should not be able to harass another party by repeatedly filing infringement suits after  
26 getting a final judgment of non-infringement. See Mot. at 7-8; see also *Kessler*, 206 U.S. at 290;  
27 *Brain Life, LLC v. Elekta Inc.*, 746 F.3d 1045, 1055-56 (Fed. Cir. 2014). Yet that is exactly what

1 is happening here. TPL brought its claim in the ITC, it lost, it chose not to appeal, and it is instead  
 2 pursuing the exact same claim in this Court. The wasteful, costly, and harassing effect of this  
 3 attempt to relitigate the judgment of non-infringement is exactly the same as it would be if the first  
 4 suit were filed in a different federal court rather than the ITC. TPL provides no argument to the  
 5 contrary.

6       Indeed, the rationale for applying the *Kessler* doctrine here is considerably stronger than in  
 7 *MGA, Inc. v. General Motors Corp.*, 827 F.2d 729 (Fed. Cir. 1987), where the Federal Circuit  
 8 applied the doctrine to a state court judgment. *See* Mot. at 6. TPL argues that *MGA* is inapposite  
 9 because it did not involve an ITC decision. *See* Opp. at 11. But this difference actually makes it  
 10 more clear that the *Kessler* doctrine applies here. In *MGA*, the Federal Circuit applied the *Kessler*  
 11 doctrine because the plaintiff “had its day in court with a full trial on the merits of its case.” 827  
 12 F.2d at 735. The same is true here. But unlike the state court in *MGA*, which has no expertise and  
 13 generally no jurisdiction over patent claims, the ITC has considerable expertise and undisputed  
 14 jurisdiction. Moreover, unlike the state court, an appeal from the ITC goes to the Federal Circuit,  
 15 the same court that would decide the issue from any federal court. Simply put, there is no logical  
 16 reason why a state court determination of non-infringement would be binding, but an ITC  
 17 judgment of non-infringement would not.

18       TPL identifies only one distinction between the ITC and other tribunals: that the ITC  
 19 cannot award damages. Opp. at 3, 5, 9 n.4. However, TPL fails to explain how the ITC’s  
 20 limitation to injunctive relief is relevant to *Kessler*’s analysis that a patentee should not be able to  
 21 harass another party with multiple suits after a judgment of non-infringement.<sup>1</sup> Similarly, the

---

23       <sup>1</sup> TPL notes that the nature of the remedies available does affect entitlement to preclusion  
 24 under res judicata. Opp. at 5. That makes sense because res judicata would completely bar a  
 25 second suit, even if the patentee were successful in proving infringement in the ITC, thereby  
 26 preventing the patentee from receiving damages under any circumstances. That logic is  
 27 inapplicable here because the *Kessler* doctrine bars a second suit *only* for a finding of non-  
 infringement, so the doctrine would not foreclose damages available in federal court for any  
 successful infringement claim in the ITC.

1 form of relief is irrelevant to *Brain Life*'s analysis that a judgment of non-infringement means that  
 2 a challenged product "acquires the 'status' of a noninfringing device." 746 F.3d at 1057. TPL  
 3 does not argue that the limitation to injunctive relief affected the arguments it presented to the ITC  
 4 on non-infringement or the ITC's analysis of those arguments – because it did not. TPL took its  
 5 best shot, lost, and chose not to appeal.

6 TPL also suggests that preclusion is unfair because the defendants requested a stay of this  
 7 action in favor of the ITC action. *See* Opp. at 7. In fact, the parties jointly requested the stay here.  
 8 *See* Dkt. 9. In any event, the stay is irrelevant because regardless of which case went first, the  
 9 issue ultimately would have ended up in the same place – the Federal Circuit – had TPL exercised  
 10 its right to appeal.

11       **B. Neither Congress Nor the Federal Circuit Has Addressed Whether an ITC**  
 12       **Judgment of Non-Infringement Is Binding**

13 Instead of discussing the applicability of the language or analysis in *Kessler*, TPL relies on  
 14 the idea that Federal Circuit case law forecloses this motion. Opp. at 4-6. It does not. None of  
 15 the cases TPL cites considered the *Kessler* doctrine. Mot. at 7. TPL suggests that this omission is  
 16 telling, *see* Opp. at 11 & n.5, but as Barnes & Noble previously pointed out, there was no reason  
 17 to consider *Kessler* before because none of these cases involved a finding of non-infringement  
 18 (aside from one case where an appealed ITC judgment was held *binding* as a matter of stare  
 19 decisis). Mot. at 7 & n.4. Thus, there is no Federal Circuit law that even suggests, let alone holds,  
 20 that an ITC judgment of non-infringement is not binding.<sup>2</sup> Once again, TPL simply ignores this  
 21 point.

---

22

23       <sup>2</sup> While TPL block-quotes extensive passages from Federal Circuit cases saying that ITC  
 24 decisions do not have preclusive effect, Opp. at 5-6, those passages plainly refer only to claim  
 25 preclusion and issue preclusion, *i.e.*, res judicata and collateral estoppel. *See Texas Instruments*  
*Inc. v. Cypress Semiconductor Corp.*, 90 F.3d 1558, 1568 n.9 (Fed. Cir. 1996) ("Our analysis here  
 26 is limited to the doctrine of issue preclusion."); *Bio-Technology General Corp. v. Genentech, Inc.*,  
 27 80 F.3d 1553, 1564 (Fed. Cir. 1996) ("The legislative history of the Trade Reform Act of 1974  
 28 supports the view that ITC decisions with respect to patent issues should have no *claim preclusive*  
 effect in later district court litigation. ... Thus, in view of the jurisdictional limitations on the relief  
 (footnote continued)

1       TPL also errs in arguing that Congress has said that ITC decisions should not be binding.  
 2 To begin with, while TPL purports to rely on “Congress” and “statutory” authority, Opp. at 4,  
 3 what it actually relies upon is a Senate Report.<sup>3</sup> Moreover, that Senate Report – just like the  
 4 Federal Circuit precedent that cites it – by its terms applies only to the specific doctrines of res  
 5 judicata and collateral estoppel: “[A]ny disposition of a Commission action by a Federal Court  
 6 should not have a res judicata or collateral estoppel effect in cases before such courts.” S. Rep.  
 7 No. 1298, 93d Cong., 2d Sess. 196 (1974). This statement is therefore inapplicable to the *Kessler*  
 8 doctrine. Also, the Senate Report’s basis for this statement was the point that “the Commission is  
 9 not, of course, empowered under existing law to set aside a patent as being invalid or to render it  
 10 unenforceable,” *id.*, a point that is irrelevant to a finding of non-infringement. Indeed, other  
 11 language in the Senate Report made clear that “[i]t was the intent of Congress that greater weight  
 12 and finality be accorded to the Commission’s findings as compared with those of a trial court.”  
 13 *Tandon Corp. v. U.S. Int’l Trade Comm’n*, 831 F.2d 1017, 1019 (Fed. Cir. 1987) (citing S. Rep.  
 14 No. 466, 96th Cong., 1st Sess. 26 (1979)). In short, there is nothing in the statute that governs the  
 15 issue, and the Senate Report does not consider the *Kessler* doctrine or findings of non-  
 16 infringement. Indeed, TPL’s theory suggests that Congress had the very specific and peculiar  
 17 intent to have ITC decisions not be binding except when appealed to the Federal Circuit, at which  
 18 point they would be binding. There is nothing in the statute to suggest that Congress intended this  
 19 result.

20       Finally, the fact that the Federal Circuit and the Senate Report have determined that res  
 21 judicata and collateral estoppel do not apply cannot dictate whether the *Kessler* doctrine does  
 22 apply. The *Kessler* doctrine was created for the exact purpose of “fill[ing] the gaps” when res  
 23 judicata or collateral estoppel are inapplicable but the party should still be bound based on the  
 24 \_\_\_\_\_

25 available in the ITC, we hold that the ITC’s prior decision cannot have *claim preclusive* effect in  
 26 the district court.”) (emphases added).

27       <sup>3</sup> The statute at issue is 19 U.S.C. § 1337, and it says nothing at all about the preclusive effect  
 28 of an ITC decision.

1 particular interests at stake in preventing unfair harassment with multiple infringement suits.

2 *Brain Life*, 746 F.3d at 1056; *see also SpeedTrack, Inc. v. Office Depot, Inc.*, No. C 07-3602 PJH,

3 2014 WL 1813292, at \*9 (N.D. Cal. May 6, 2014). TPL says collateral estoppel would apply here

4 if Congress had not barred it, Opp. at 9-10, then immediately contradicts that argument by stating

5 that collateral estoppel would not apply anyway, *id.* at 9 n.4. In any event, whether barred as a

6 matter of common law or by the Senate Report, the unavailability of collateral estoppel fits exactly

7 the point of the *Kessler* doctrine: to recognize preclusion where collateral estoppel does *not* apply,

8 in the limited context of a judgment of non-infringement. Had TPL appealed, stare decisis would

9 have “filled the gap” by closing the loophole TPL seeks to exploit. Thus, contrary to TPL’s

10 argument that there is no “gap” to fill here, Opp. at 9, there is a gap and TPL caused it. Moreover,

11 a gap exists here every bit as much as it did in *Kessler* and *Brain Life* because collateral estoppel is

12 unavailable despite the fact that there is an adverse judgment involving the same claim that the

13 parties already spent considerable resources litigating before a competent tribunal. The reason

14 why collateral estoppel does not apply is irrelevant to whether preclusion under *Kessler* does

15 apply. And even if the reason did matter, as discussed above, the reason given in the Senate

16 Report is inapplicable to a finding of non-infringement.

17       C.     **TPL Cannot Evade the Binding Effect of an ITC Finding of Non-Infringement**

18       **by Choosing Not to Appeal**

19       TPL’s arguments fail entirely to address the fact that an ITC decision *is* binding, as a

20 matter of stare decisis, when the Federal Circuit decides an appeal from that decision. Mot. at 8.

21 Thus, contrary to TPL’s assertion that the *Kessler* doctrine would “swallow[] the congressionally

22 mandated rule” against preclusion from ITC decisions, Opp. at 11, *Kessler* would apply *only* to an

23 ITC judgment of non-infringement and *only* where the patentee chose not to appeal – since the

24 ITC’s decision is already binding after an appeal. Conversely, the only result of adopting TPL’s

25 argument is that it will allow a party to evade an adverse ITC judgment by choosing not to appeal.

26 Yet that result is in direct conflict with the well-established principle that a party should not be

27 able to avoid the binding effect of a judgment by its choice not to appeal.

28

1        There is no legal or practical basis to allow a party to evade an ITC judgment of non-  
 2 infringement by strategically choosing not to appeal, simply to start from scratch in district court.  
 3 TPL does not dispute or distinguish any of the case law establishing that courts consistently refuse  
 4 to give a party the benefit of a tactical decision not to appeal, including an appeal from an  
 5 administrative tribunal that could have gone to an Article III court. Mot. at 9 (citing cases).  
 6 Instead, TPL's only response seems to be that its decision not to appeal was not a strategic  
 7 judgment, but rather a matter of timing. *See* Opp. at 3.

8        However, the facts belie this assertion for three reasons. First, based on average length of  
 9 a Federal Circuit appeal of 14.4 months, *see* Opp. at 3 n.2, the appeal from the ITC's February  
 10 2014 judgment would have been completed in time for TPL to get an injunction before the  
 11 September 2015 expiration of the patent. Moreover, the average time could almost certainly have  
 12 been shortened if, for example, TPL moved for an expedited appeal or simply filed its brief before  
 13 the due date. Thus, there was no serious risk that the appeal would have been moot. Second,  
 14 under TPL's logic, there was barely any point in bringing the ITC action at all, since the ITC  
 15 decision came only one-and-a-half years before the expiration of the patent. Indeed, even if TPL  
 16 had prevailed in the ITC, there would have been an appeal from the alleged infringers, and thus it  
 17 was inevitable that there would have been only a short time between the ultimate decision on an  
 18 injunction and the expiration of the patent. Third, TPL had a strong incentive to appeal because  
 19 (regardless of the *Kessler* issue) the Federal Circuit's decision would have been binding in this  
 20 case as a matter of stare decisis. Thus, TPL could have gotten the definitive claim construction  
 21 that instead it seeks to litigate here, which will still end up in the Federal Circuit if any of the  
 22 parties choose to appeal.<sup>4</sup> The only benefit to TPL in creating this circuitous route to the Federal  
 23  
 24

---

25       <sup>4</sup> TPL also avoided a definitive decision by settling an appeal in *HTC v. TPL*, No. 5:08-cv-  
 26 00882-PSG (N.D. Cal.). While TPL praises the district court's decision in the *HTC* case, Opp. at  
 27 2-3, TPL does not argue that the decision should have any effect on this case, and for good reason:  
 Barnes & Noble was not a party to that case, and there is no stare decisis effect because the appeal  
 was settled.

28

1 Circuit is that it drives up litigation costs. Simply put, TPL's decision not to appeal is exactly the  
2 sort of gamesmanship that courts routinely disallow and this Court should likewise reject.

## **CONCLUSION**

4 For the foregoing reasons and the reasons stated in its opening brief, Barnes & Noble, Inc.  
5 respectfully requests that the Court grant this motion in accordance with Rule 12(c) and enter  
6 judgment on the pleadings, dismissing Plaintiffs' third cause of action with prejudice.
